

HYDCHEM - 405

HYDCHEM – 405 is an oxidizing micro biocide in liquid form. It is highly effective against a broad spectrum of micro – organisms. Being oxidizing in nature **HYDCHEM– 405** provides an accelerated response followed by a gradual action to effectively combat the menace of algae, fungi and bacteria. It is safe and has no impacts on cooling tower fill material be it wood or plastic.

HYDCHEM – 405 is used to control build-up of biological slimes formed by algae and bacteria in Cooling Water Systems. The Product is also effective in controlling sulphate reducing bacteria. High surface activity aids in cleaning systems by loosening and dispersing existing slime deposits from surfaces of Cooling System Equipment.

APPLICATION:-

To be mixed with feed water in the Feed water tank or at the inlet of the Feed water pump.

TYPICAL PHYSICAL PROPERTIES.

pH	: 10.5-11.0
appearance	: LIQUID
Miscibility	: Completely miscible in water.
Colour	: Brown

DOSAGE

Depends on Feed Water Quality / Quantity. Follow our Service Personnel recommendation.

PACKING

35 Kgs. In HDPE Carboys.

HANDLING AND STORAGE

The Product is safe for use in boilers. It can be stored in the boiler house. Please, wear protective gloves and goggles while handling the product. Wash with excess water whenever it contacts the skin.
