

## HYDCHEM – 227 I

**HYDCHEM – 227 I** is a liquid chemical formulation designed for feed water treatment of coil type boilers. It contains a powerful anti-scaling along with a catalyzed oxygen scavenger. It reduces oxygen corrosion and deposition of calcium and iron compounds in the coils without contributing much to the dissolved solids.

### APPLICATION:-

To be mixed with feed water in the Feed water tank or at the inlet of the Feed water pump.

### TYPICAL PHYSICAL PROPERTIES

pH : 13 – 14  
Spec. gravity : 1.0 – 1.1  
Miscibility : Completely Miscible in water.  
Color : Colorless to pale Yellow

### DOSAGE

Depends on Feed Water Quality / Quantity. Follow our Service Personnel recommendation.

### PACKING

35 Kgs. In HDPE Carbouys.

### HANDLING AND STORAGE

The Product is safe for use in boilers. It can be stored in the boiler house. Please, wear protective gloves and goggles while handling the product. Wash with excess water whenever it contacts the skin.
