

## HYDCHEM - 404

**HYDCHEM – 404** is a biodegradable, wide-spectrum, organic liquid microbiocide based on quaternary ammonium compounds formulated to provide maximum effectiveness in industrial recirculating cooling water systems.

**HYDCHEM – 404** is used to control build-up of biological slimes formed by algae and bacteria in Cooling Water Systems. The Product is also effective in controlling sulphate reducing bacteria. High surface activity aids in cleaning systems by loosening and dispersing existing slime deposits from surfaces of Cooling System Equipment.

### APPLICATION:-

To be mixed with feed water in the Feed water tank or at the inlet of the Feed water pump.

### TYPICAL PHYSICAL PROPERTIES.

pH	: 7.5 – 8.5
Spec. gravity	: 0.9 – 1.0
Miscibility	: Completely miscible in water.
Colour	: Colourless Foamy liquid.

### DOSAGE

Depends on Feed Water Quality / Quantity. Follow our Service Personnel recommendation.

### PACKING

35 Kgs. In HDPE Carboys.

### HANDLING AND STORAGE

The Product is safe for use in boilers. It can be stored in the boiler house. Please, wear protective gloves and goggles while handling the product. Wash with excess water whenever it contacts the skin.
