

HYDCHEM - 115

HYDCHEM – 115 is an alkaline formulation used to increase the alkalinity of Boiler Feed Water. **HYDCHEM – 115** has a blend of polymer to prevent ferric hydroxide formation and also assist in control of corrosion. It is used to reduce corrosion in Feed Water Tanks Lines, Pump and Boilers. Addition of **HYDCHEM – 115** has been very helpful in maintaining the pH as well as the alkalinity in the Boiler Water.

APPLICATION:

To be mixed with feed water in the feed water tank or at the inlet of the feed water pump.

TYPICAL PHYSICAL PROPERTIES

pH	: 12.0 – 13.0
Spec.gravity	: 1.3 – 1.4
Miscibility	: Completely miscible in water.
Colour	: Colourless.

DOSAGE:

Depends on feed water quality /quantity.
Follow our Service Personnel recommendation.

PACKING:

35 & 50 Kgs. HDPE Carbouy.

HANDLING AND STORAGE:

The Product is safe for use in Boilers. It can be stored in the boiler house. Please, wear protective gloves and goggles while handling the product. Wash with excess water whenever it contacts the skin. Take medical aid immediately.
