

# **HYDCHEM 3595 I**

It is a unique blend of dispersant and threshold inhibitors. It ensures that scale forming salts are dispersed and they do not form any deposit in the system. It is designed as a threshold agent to prevent any build up of scales and deposits on the water side surfaces of heat exchangers, spraying nozzles and similar equipments. It conditions cooling water sludge to prevent accumulations on critical water side surfaces. It also has a dispersive and penetrative effect on bio-film.

## **APPLICATION:**

To be mixed with humidification  
plant water or cooling water sump

## **TYPICAL PHYSICAL PROPERTIES**

pH	: 7 – 8
Spec.gravity	: 1 – 1.1
Miscibility	: Completely miscible in water.
Co lour	: Colourless to pale Yellow.

## **DOSAGE:**

Depends on feed water quality /quantity.

## **PACKING:**

35 Kgs. HDPE Carbouy.

## **HANDLING AND STORAGE:**

The Product is safe for use in Cooling Towers and in humidification plants. It can be stored in any Store Rooms with normal Mechanical Ventillation. Please, wear protective gloves and goggles while handling the product. Wash with excess water whenever it contacts the skin.
